

# Non-Clinical Dental Fellowship

## About us

The Non-Clinical Dental Fellowship (NCDF) was born out of a question that many dental graduates silently carry:

- "What if I don't want to practice clinically—but still want to build a meaningful career in healthcare?"

In today's rapidly evolving health landscape, dentistry isn't limited to the dental chair. Yet, most BDS graduates are unaware of the countless high-impact, non-clinical roles available in healthcare, life sciences, pharma, public health, and tech.

That's where NCDF comes in.

## Our Mission

To provide clarity, confidence, and community to dental graduates exploring non-clinical career paths.

### What We Do

- Live expert-led sessions covering roles like Product Management, Public Health (MPH), Hospital Administration (MHA), Pharmacovigilance, Medical Affairs, and more.
- Industry-backed curriculum that bridges the gap between a BDS degree and market-ready non-clinical skills.
- Mentorship & Career Support to help you align your strengths with the right pathway.
- Resume reviews, LinkedIn branding, and interview preparation tailored for non-clinical transitions

## Fellowship Curriculum

This curriculum has been designed for dental professionals who are ready to redefine what success looks like—whether it's creating digital health products, managing hospital systems, improving public health, or working in corporate pharma.

You'll learn not just the "what" of each role—but also the "how" to get there.

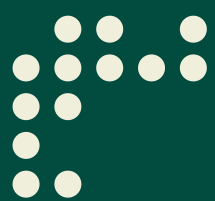

Now, let's dive into the roadmap.
